

A Minimal Document Template

v0.2.0

Gleb Ebert

2024-01-30

Introduction

This template gets rid of much of the white space that you find in most title blocks, reduces page margins and uses a smaller default font size of 10pt. Thus more text fits on one page. It also features a header that includes identifying information of the document.

Installation

Creating a New Project

You can use this Minimal Document template to start a new project by running the following command in the terminal:

```
quarto use template gl-eb/minimal-document
```

Using the Template in an Existing Project

You can install this Minimal Document template into an existing project by running the following command in the terminal:

```
quarto add extension gl-eb/minimal-document
```
